Kundalika Fun Adventures. (Class Xth school picnic)

School is second home of students where best efforts are taken to propagate best values for development of a child. This is one of the efforts for personality development of students through experiential learning and hence this specially designed program.

On campsite, students will be involved in various activities mentioned below. Below is a brief description of activities.

Commando crossing

This activity is designed to help you learn to balance yourself while walking on the high rope, by holding the rope over the head.

Burma Bridge

Asemblance of improvised bridges used in Burma – a land full of water channels and rivers. This is a bridge that consists of a thick rope for walking upon, and two ropes to hold on to. You are ready to cross when you have put on the harness and connected yourself to the safety rope. All that remains is a 18-metre suspended walk in natural surroundings.

Raft building

This is a fun activity which requires full team co ordination along with imagination. Teams are provided bamboos as well as tires using which they will have to build a raft which is practically usable in still water. This activity helps improving communication and coordination skills.

Various other life skills activities such as Trust walk, Foot Cricket, Night Trail, Treasure hunt, Campfire etc.

All the activities are completely safe and are conducted under the supervision of experts. Depending upon the time used by teams, some of the activities may need to be combined with other activities.
